STĒAM, (steem,) *n.* [Sax. *steam, stem*; D. *stoom.*]

1. The vapor of water; or the elastic, aëriform fluid generated by heating water to the boiling point. When produced under the common atmospheric pressure, its elasticity is equivalent to the pressure of the atmosphere, and it is called Low Steam; but when heated in a confined state, its elastic force is rapidly augmented, and it is then called High Steam. On the application of cold, steam instantly returns to the state of water, and thus forms a sudden vacuum. From this property, and from the facility with which an elastic force is generated by means of steam, this constitutes a mechanical agent at once the most powerful and the most manageable, as is seen in the vast and multiplied uses of the steam engine.

Steam is invisible, and is to be distinguished from the cloud or mist which it forms in the air, that being water in a minute state of division, resulting from the condensation of steam. *Olmsted.*

The principle of the steelyard is that of the lever; where an equilibrium is produced, when the products of the weights on opposite sides into their respective distances from the fulcrum, are equal to one another. Hence a less weight is made to indicate a greater, by being removed to a greater distance from the fulcrum. Sometimes the purpose is effected by means of a coiled spiral spring.

STEP [Sax. *steop*, from *stepan*, to deprive] is prefixed to certain words to express a relation by marriage. I have given the explanation which appears to be most probably correct. If the radical sense of *step*, a pace, is to part or open, the word coincides with Sax. *stepan*, to deprive, and in the compounds above, *step* may imply removal or distance.]

We see that *strike, stroke*, and *streak*, and the L. *stringo*, whence *strain, strict, stricture*, &c., are all radically one word. *Strong* is of the same family. Hence we see the sense is, to rub, to scrape; but it includes often the sense of thrusting. It is to touch or graze with a sweeping or stroke. Hence the use of *stricken*, applied to age, worn with age, as in the L. *strigo*, the same word differently applied. Hence also we see the propriety of the use of *stricture*, applied to criticism. It seems to be formed on the root of *rake* and *stretch*.]

Pope Gregory XIII. reformed the calendar by retrenching 10 days in October, 1582, in order to bring back the vernal equinox to the same day as at the time of the council of Nice, A. D. 325; this reformation was adopted by act of parliament in Great Britain in 1751, by which act 11 days in September, 1752, were retrenched, and the third day was reckoned the fourteenth. This mode of reckoning is called *New* Style, according to which every year divisible by 4, unless it is divisible by 100, without being divisible by 400, has 366 days, and any other year 365 days.

1. A well-known substance manufactured chiefly from the sugar-cane, Saccharum officinarum; but in the United States, great quantities of this article are made from the sugar maple; and in France, from the beet. The saccharine liquor is concentrated by boiling, which expels the water; lime is added to neutralize the acid that is usually present; the grosser impurities rise to the surface, and are separated in the form of scum; and finally, as the liquor cools, the sugar separates from the molasses in grains. The sirup or molasses is drained off, leaving the sugar in the state known in commerce by the name of *raw* or *muscovado* sugar. This was formerly purified by means of clay, or more extensively by bullocks' blood, which, forming a coagulum, enveloped the impurities. This process is now more usually performed by means of animal charcoal or bone black, and by steam. Thus clarified, it takes the names of *lump*, *loaf*, *refined*, &c., according to the different degrees of purification. Sugar is a proximate element of the vegetable kingdom, and is found in most ripe fruits, and many farinaceous roots. By fermentation, sugar is converted into alcohol, and hence forms the basis of those substances which are used for making intoxicating liquors, as molasses, grapes, apples, malt, &c.

1. A letter, or a combination of letters, uttered together, or at a single effort or impulse of the voice.

A vowel may form a syllable by itself, as *a*, the definitive, or in *amen*; *e* in *even*; *o* in *over*, and the like. A syllable may also be formed of a vowel and one consonant, as in *go*, *do*, *in*, *at*; or a syllable may be formed by a vowel with two articulations, one preceding, the other following it, as in *can*, *but*, *tun*; or a syllable may consist of a combination of consonants, with one vowel or diphthong, as *strong*, *short*, *camp*, *voice.*

A syllable sometimes forms a word, and is then significant, as in *go*, *run*, *write*, *sun*, *moon.* In other cases a syllable is merely a part of a word, and by itself is not significant. Thus *ac*, in *active*, has no signification.

At least one vowel, or open sound, is essential to the formation of a syllable; hence in every word there must be as many syllables as there are single vowels, or single vowels and diphthongs. A word is called according to the number of syllables it contains, viz.:—

Monosyllable; a word of one syllable.

An oak is a plant;
Therefore an oak has not the power of locomotion.

T.

T IS the twentieth letter of the English alphabet, and a close consonant. It represents a close joining of the end of the tongue to the root of the upper teeth, as may be perceived by the syllable *at*, *et*, *ot*, *ut*, in attempting to pronounce which, the voice is completely intercepted. It is therefore numbered among the mutes, or close articulations, and it differs from *d* chiefly in its closeness; for in pronouncing *ad*, *ed*, we perceive the voice is not so suddenly and entirely intercepted, as in pronouncing *at* and *et*. *T*, by itself, has one sound only, as in *take*, *turn*, *bat*, *bolt*, *smite*, *bitter*. So we are accustomed to speak; but in reality, *t* can be hardly said to have any sound at all. Its use, like that of all mute articulations, is to modify the manner of uttering the vocal sound which precedes or follows it.

When *t* is followed by *h*, as in *think* and *that*, the combination really forms a distinct sound, for which we have no single character. This combination has two sounds in English; aspirated, as in *think*, and vocal, as in *that*.

The letters *ti*, before a vowel, and unaccented, usually pass into the sound of *sh*, as in *nation*, *motion*, *partial*, *substantiate*; which are pronounced *nashon*, *moshon*, *parshal*, *substanshate*. In this case, *t* loses entirely its proper sound or use, and being blended with the subsequent letter, a new sound results from the combination, which is in fact a simple sound. In a few words, the combination *ti* has the sound of the English *ch*, as in *Christian*, *mixtion*, *question*.

T is convertible with *d*. Thus the Germans write *tag*, where we write *day*, and *gut*, for *good*. It is also convertible with *s* and *z*, for the Germans write *wasser*, for *water*, and *zahm*, for *tame*.

T., as an *abbreviation*, stands for *theologia*; as, S. T. D., *sanctæ theologiæ doctor*, doctor of divinity. In *ancient monuments and writings*, T. is an abbreviature, which stands for *Titus*, *Titius*, or *Tullius*.

As a *numeral*, T, among *the Latins*, stood for 160, and with a dash over the top, $\overline{T}$, for 160,000. *Encyc.*

In *music*, T is the initial of tenor, vocal and instrumental; of *tacet*, for silence, as *adagio tacet*, when a person is to rest during the whole movement. In *concertos and symphonies*, it is the initial of *tutti*, the whole band, after a solo It sometimes stands for *tr.* or *trillo*, a shake.

THAN, *adv.* or *conj.* [Sax. *thanne*; Goth. *than*; D. *dan.* This word signifies also *then*, both in English and Dutch. The Germans express the sense by *als*, as.]

This word is placed after some comparative adjective or adverb, to express comparison between what precedes and what follows. Thus Elijah said, I am not better *than* my fathers; wisdom is better *than* strength; Israel loved Joseph more *than* all his children; all nations are counted less *than* nothing; I who am less *than* the least of all saints; the last error shall be worse *than* the first; he that denies the faith is worse *than* an infidel.

After *more*, or an equivalent termination, the following word implies *less*, or *worse*; after *less*, or an equivalent termination, it implies *more* or *better.*

THĂNE, *n.* [Sax. *thegn*, *thægn*, a minister or servant; *thegnian*, *thenian*, to serve; D. and G. *dienen*, to serve; Sw. *tiena*, to serve; *tienare*, a servant; Dan. *tiener*, to serve; *tiener*, a servant. If *g* is radical, this word belongs to Class Dg; if not, to Class Dn, No. 10.]

The thanes in England were formerly persons of some dignity; of these there were two orders, the king's thanes, who attended the Saxon and Danish kings in their courts, and held lands immediately of them, and the ordinary thanes, who were lords of manors, and who had a particular jurisdiction within their limits. After the Conquest, this title was disused, and *baron* took its place.

THANK, *v. t.* [Sax. *thancian*; G. and D. *danken*; Ice. *thacka*; Sw. *tacka*; Dan. *takker.* We see by the Gothic dialects that *n* is not radical. To ascertain the primary sense, let us attend to its compounds; G. *abdanken*, (which in English would be *off-thank*,) to dismiss, discharge, discard, send away, put off, to disband or break, as an officer; *verdanken*, to owe or be indebted; D. *afdanken*, to cashier or discharge. These senses imply a sending. Hence, *thank* is probably from the sense of giving, that is, a render or return.]

1. To express gratitude for a favor; to make acknowledgments to one for kindness bestowed.

THAT, *an adjective, pronoun*, or *substitute.* [Sax. *thæt*, *that*; Goth. *thata*; D. *dat*; G. *das*; Dan. *det*; Sw. *det.* Qu. Gr. ταυτος. This word is called in Saxon and German an article, for it sometimes signifies *the.* It is called also in Saxon a pronoun, equivalent to *id*, *istud*, in Latin. In Swedish and Danish, it is called a pronoun of the neuter gender. But these distinctions are groundless and of no use. It is probably from the sense of setting.]

1. *That* is a word used as a definitive adjective, pointing to a certain person or thing before mentioned, or supposed to be understood. Here is *that* book we have been seeking this hour; here goes *that* man we were talking of.

> It shall be more tolerable for Sodom and Gomorrah in the day of judgment, than for *that* city. — Matt. x.

2. *That* is used definitively, to designate a specific thing or person emphatically.

> The woman was made whole from *that* hour. — Matt. ix.

In these cases, *that* is an adjective. In the two first examples, *the* may be substituted for it. Here is *the* book we have been seeking; here goes *the* man we were talking of. But in other cases, *the* can not supply its place, and *that* may be considered as more emphatically definitive than *the.*

3. *That* is used as the representative of a noun, either a person or a thing. In this use, it is often a pronoun and a relative. When it refers to persons, it is equivalent to *who*, and when it refers to a thing, it is equivalent to *which.* In this use, it represents either the singular number or the plural.

> He *that* reproveth a scorner getteth to himself shame. — Prov. ix.
> They *that* hate me without a cause are more than the hairs of my head. — Ps. lxiii.
> A judgment *that* is equal and impartial must incline to the greater probabilities. *Wilkins.*
> They shall gather out of his kingdom all things *that* offend. — Matt. xiii.

4. *That* is also the representative of a sentence or part of a sentence, and often of a series of sentences. In this case, *that* is not strictly a pronoun, a word standing for a noun, but is, so to speak, a *pro-sentence*, the substitute for a sentence, to save the repetition of it.

> And when Moses heard *that*, he was content. — Lev. x.

That here stands for the whole of what Aaron had said, or the whole of the preceding verse.

> I will know your business, *that* I will. *Shak.*
> Ye defraud, and *that* your brethren. — 1 Cor. vi.

That, sometimes, in this use, precedes the sentence or clause to which it refers.

> *That* be far from thee, to do after this manner, *to slay the righteous with the wicked.* — Gen. xviii.

That here represents the clause in Italics.

5. *That* sometimes is the substitute for an adjective. You allege that the man is *innocent*; *that* he is not.

6. *That*, in the following use, has been called a conjunction. I heard *that* the Greeks had defeated the Turks. But in this case, *that* has the same character as in No. 4. It is the representative of the part of the sentence which follows, as may be seen by inverting the order of the clauses. The Greeks had defeated the Turks; I heard *that.* It is not *that* I love you less. *That* here refers to the latter clause of the sentence, as a kind of demonstrative.

7. *That* was formerly used for *that which*, like *what.*

> We speak *that* we do know, and testify *that* we have seen. — John iii.

[This use is no longer held legitimate.]

8. *That* is used in opposition to *this*, or by way of distinction.

> If the Lord will, we shall live, and do this or *that.* — James iv.

9. When *this* and *that* refer to foregoing words, *this*, like the Latin *hic* and Fr. *ceci*, refers to the latter, and *that* to the former. It is the same with *these* and *those.*

> *Self-love* and *reason* to one end aspire,
> Pain their aversion, pleasure their desire;
> But greedy *that*, its object would devour,
> *This* taste the honey, and not wound the flower. *Pope.*

10. *That* sometimes introduces an explanation of something going before. "Religion consists in living up to those principles; *that* is, in acting in conformity to them." Here, *that* refers to the whole first clause of the sentence.

11. "Things are preached, not in *that* they are taught, but in *that* they are published." Here, *that* refers to the words which follow it.

So when *that* begins a sentence. "*That* we may fully understand the subject, let us consider the following propositions." *That* denotes purpose, or rather introduces the clause expressing purpose, as will appear by restoring the sentence to its natural order "Let us consider the following propositions, *that* [for the purpose expressed in the following clause] we may fully understand the subject." "Attend *that* you may receive instruction." Here, also, *that* expresses purpose elliptically: "Attend for the purpose *that* you may receive instruction;" *that* referring to the last member.

This elliptical use of *that* is very frequent; the preposition *for* being understood. "A man travels *that* he may regain his health." He travels *for that* purpose, he may regain his health. The French often retains the preposition in such cases; *pour* que. "Do all things without murmurings and disputings, *that* ye may be blameless and harmless." *Phil.* ii. 14. Do all things without murmurings, *for that* purpose, *to that* effect, ye may be blameless.

In that; a phrase denoting consequence, cause, or reason; *that* referring to the following sentence. *Heb.* v. 7.

They hold no property, nor do they beg, but depend on what Providence sends. Their chief employment is preaching and giving religious instruction. At one time, they attempted missions to Tartary and Georgia, in Asia, but soon abandoned them. Their name, *Theatins*, is derived from *Theate*, or *Chieti*, a city of Naples, the archbishop of which was a principal founder of the order. But they bore various names; as *Regular Clerks of the Community*, *Pauline Monks*, *Apostolic Clerks*, and *Regular Clerks of the Divine Providence.* The order never flourished much out of Italy. *Murdock.*

To constitute *theft*, the taking must be in private, or without the owner's knowledge; and it must be unlawful or felonious, that is, it must be with a design to deprive the owner of his property privately and against his will. *Theft* differs from *robbery*, as the latter is a violent taking from the person, and of course not private.

2. The thing stolen. *Exod* xxii

THEFT'-BOTE, *n.* [*theft* and Sax. *bote*, compensation.]

2. *Theirs* is used as a substitute for the adjective and the noun to which it refers, and in this case, it may be the nominative to a verb. "Our land is the most extensive, but *theirs* is the best cultivated." Here *theirs* stands as the representative of *their land*, and is the nominative to *is.*

Nothing but the name of zeal appears
'Twixt our best actions and the worst of *theirs.* *Denham.*

In this use, *theirs* is not in the possessive case, for then there would be a double possessive.

THE'MIS, *n.* [Gr.] In *the mythology of the Greeks*, the goddess of law.

In some cases, *themselves* is used without *they*, and stands as the only nominative to the following verb *Themselves* have done the mischief.

This word is used also in the objective case after a verb or preposition. Things in *themselves* innocent, may, under certain circumstances, cease to be so.

THER-MO-TEN'SION, *n.* [Gr. θερμος, hot, and L. *tensio*, a stretching.]

Literally, a stretching by heat. This word is applied by Professor Johnson to a process of increasing the direct cohesion of wrought iron. It consists in heating the metal to a determinate temperature, generally from 500 to 600 degrees Fahrenheit, and in that state giving to it, by appropriate machinery, a mechanical strain or tension in the direction in which the strength is afterward to be exerted. The degree of tensile force applied is determined beforehand by trials on the same quality of metal at ordinary atmospheric temperature, to ascertain what force would, in that case, have been sufficient to break the piece which is to be submitted to thermotension. If this process should succeed, it may be of great use in giving strength to chain cables.

THINE, *pronominal adj.* [Goth. *theins*, *theina*; Sax. *thin*; G. *dein*; Fr. *tien*; probably contracted from *thigen*. See THOU.]

Thy; belonging to thee; relating to thee; being the property of thee. It was formerly used for *thy*, before a vowel.

Then thou mayest eat grapes thy fill, at *thine* own pleasure. — Deut. xxii.

But in common usage, *thy* is now used before a vowel in all cases.

The principal use of *thine* now is when a verb is interposed between this word and the noun to which it refers. I will not take any thing that is *thine*. *Thine* is the kingdom, and the power, and the glory.

In the following passage, *thine* is used as a substitute for *thy righteousness*.

I will make mention of *thy righteousness*, even of *thine* only. — Ps. lxxi.

In some cases it is preceded by the sign of the possessive case, like nouns, and is then also to be considered as a substitute.

If any *of thine* be driven out to the utmost parts of heaven. — Deut. xxx.

It is to be observed that *thine*, like *thou*, is used only in the solemn style. In familiar and common language, *your* and *yours* are always used in the singular number as well as the plural.

THING, *n.* [Sax. *thing*, a thing, a cause; *for his thingon*, for his cause or sake; also, *thing*, and *gething*, a meeting, council, or convention; *thingan*, *thingian*, to hold a meeting, to plead, to supplicate; *thingere*, an intercessor; *thingung*, intercession; G. *ding*, a thing, a court; *dingen*, to go to law, to hire or haggle; *Dingstag*, Tuesday, (*thing's day*:) *beding*, condition, clause; *dedingen*, to agree, to bargain or contract, to cheapen; D. *ding*, thing, business; *dingen*, to plead, to attempt, to cheapen; *dingbank*, the bar; *dingdagen*, session-days; *dinger*, *dingster*, a pleader; *dingtaal*, plea; *Dingsdag*, Tuesday; *beding*, condition, agreement; *bedingen*, to condition; Sw. *ting*, thing, cause, also a court, assizes; *tinga*, to hire, bargain, or agree; Dan. *ting*, a thing, affair, business, case, a court of justice; *tinger*, to strike up a bargain, to haggle; *tingbog*, records of a court, (*thing-book*:) *tingdag*, the court day, the assizes; *tinghold*, jurisdiction; *tingmænd*, jurors, jury, (*thingmen*:) *tingsag*, a cause or suit at law, (*thingsake*.) The primary sense of *thing*, is that which comes, falls, or happens, like *event*, from L. *evenio*. The primary sense of the root, which is *tig* or *thig*, is to press, urge, drive, or strain, and hence its application to courts, or suits at law; a seeking of right. We observe that *Dingsday*, *Dingdag*, in some of the dialects, signifies *Tuesday*, and this from the circumstance that that day of the week was, as it still is in some states, the day of opening courts; that is, *litigation day*, or *suitors' day*, a day of striving for justice; or perhaps *combat day*, the day of trial by battle. This leads to the unfolding of another fact. Among our ancestors, *Tig*, or *Tiig*, was the name of the deity of combat and war, the Teutonic Mars; that is, strife, combat deified. This word was contracted into *tiw* or *tu*, and hence *Tiwes-dæg* or *Tues-dæg*, Tuesday, the day consecrated to *Tiig*, the god of war. But it seems this is merely the day of commencing court and trial; *litigation day*. This *Tiig*, the god of war, is *strife*, and this leads us to the root of *thing*, which is, to drive, urge, strive. So *res*, in Latin, is connected with *reus*, accused. For words of like signification, see SAKE and CAUSE.]

Treason is the highest crime, of a civil nature, of which a man can be guilty. Its signification is different in different countries. *In general*, it is the offense of attempting to overthrow the government of the state to which the offender owes allegiance, or of betraying the state into the hands of a foreign power. In *monarchies*, the killing of the king, or an attempt to take his life, is treason. In *England*, to imagine or compass the death of the king, or of the prince, or of the queen consort, or of the heir apparent of the crown, is high treason; as are many other offenses created by statute.

In *the United States*, treason is confined to the actual levying of war against the United States, or in adhering to their enemies, giving them aid and comfort. *Constitution of the United States.*

Treason, in *Great Britain*, is of two kinds, *high treason* and *petit treason.* *High treason* is a crime that immediately affects the king or state; such as the offenses just enumerated. *Petit treason* involves a breach of fidelity, but affects individuals. Thus, for a wife to kill her husband, a servant his master or lord, or an ecclesiastic his lord or ordinary, is *petit treason.* But in the United States this crime is unknown; the killing, in the latter cases, being murder only.

TWIT, *v. t.* [Sax. *othwitan*, *edwitan*, *ætwitan*, to reproach, to upbraid; a compound of *ad*, *æth*, or *oth*, and *witan.* The latter verb signifies to know, Eng. to *wit*, and also to impute, to ascribe, to prescribe or appoint, also to reproach; and with *ge*, a different prefix, *gewitan*, to depart. The original verb then signifies to set, send, or throw. We have in this word decisive evidence that the first letter, *t*, is a prefix, the remains of *æth* or *oth*, a word that probably coincides with the L. *ad*, to; and hence we may fairly infer that other words, in which *t* precedes *w*, are also compound. That some of them are so, appears evident from other circumstances.]

U.

U IS the twenty-first letter and the fifth vowel in the English alphabet. Its true primary sound, in Anglo-Saxon, was the sound which it still retains in most of the languages of Europe; that of *oo* in *cool*, *tool*, answering to the French *ou* in *tour*. This sound was changed, probably under the Norman kings, by the attempt made to introduce the Norman French language into common use. However this fact may be, the first or long and proper sound of *u*, in English, is now not perfectly simple, and it can not be strictly called a *vowel*. The sound seems to be nearly that of *eu*, shortened and blended. This sound, however, is not precisely that of *eu* or *yu*, except in a few words, as in *unite*, *union*, *uniform*; the sound does not begin with the distinct sound of *e*, nor end in the distinct sound of *oo*, unless when prolonged. It can not be well expressed in letters. This sound is heard in the unaffected pronunciation of *annuity*, *numerate*, *brute*, *mute*, *dispute*, *duke*, *true*, *truth*, *rule*, *prudence*, *opportunity*, *infusion*.

Some modern writers make a distinction between the sound of *u*, when it follows *r*, as in *rude*, *truth*, and its sound when it follows other letters, as in *mute*, *duke*; making the former sound equivalent to *oo*; *rood*, *trooth*; and the latter a diphthong equivalent to *eu* or *yu*. This is a mischievous innovation, and not authorized by any general usage either in England or the United States. The difference, very nice indeed, between the sound of *u* in *mute* and in *rude*, is owing entirely to the articulation which precedes that letter. For example, when a labial, as *m* or *p*, precedes *u*, we enter on its sound with the lips closed, and in opening them to the position required for uttering *u*, there is almost necessarily a slight sound of *e* formed before we arrive at the proper sound of *u*. When *r* precedes *u*, the mouth is open before the sound of *u* is commenced. But in both cases, *u* is to be considered as having the same sound.

In some words, as in *bull*, *full*, *pull*, the sound of *u* is that of the Italian *u*, the French *ou*, but shortened. This is a vowel.

U has another short sound, as in *tun*, *run*, *sun*, *turn*. *rub*. This also is a vowel.

It is prefixed generally to adjectives and participles, and almost at pleasure. In a few instances, it is prefixed to verbs, as in *unbend*, *unbind*, *unharness*. As the compounds formed with *un* are so common and so well known, the composition is not noticed under the several words. For the etymologies, see the simple words.

Some vegetables have spontaneous motion. Vegetables alone have the power of deriving nourishment from inorganic matter, or organic matter entirely decomposed.
